PROJECTS

NFT Marketplace [Solidity · React.js · Ethers.js · Hardhat · IPFS]

Decentralized marketplace using ERC-721 for minting, listing, buying & selling NFTs with MetaMask integration and IPFS for decentralized metadata storage.

Crowdfunding Platform [Solidity · React.js · Ganache]

Trustless DApp with goal-based automated fund release; automatically refunds contributors if campaign target is unmet, eliminating fraud risk.

Certificate Verification System [Solidity · React.js · Ethers.js · Alchemy]

DApp to issue and verify tamper-proof academic credentials on Ethereum, enabling instant public verification without any central authority.
