PROFESSIONAL SUMMARY

B.Tech graduate in Computer Science (AI), currently pursuing an **MSc** in Computer Science. Blockchain developer with internship experience in building and testing Solidity smart contracts on Ethereum, and projects in NFT marketplaces, crowdfunding and certificate verification. Seeking an entry-level Web3 / Blockchain Developer role.

TECHNICAL SKILLS

Blockchain & Web3: Solidity, Ethereum, Smart Contracts, ERC-721, ERC-20, Ethers.js, IPFS, Hardhat, Remix IDE, Ganache

Languages & Web: React.js, Node.js, JavaScript , HTML5, CSS3, C/C++, Java

Tools & Core Concepts: Git & GitHub, VS Code, Netlify, Data Structures & Algorithms, Smart Contract Security Audit, DeFi

WORK EXPERIENCE

Blockchain Developer Intern | Codec Technologies | May 2025 – July 2025

- Architected, tested, and deployed 10+ production-grade Solidity smart contracts on Ethereum using Hardhat and Remix IDE, conducting rigorous security reviews to ensure zero critical vulnerabilities and achieve [gas efficiency savings.
- Implemented ERC-721 contracts for NFT Marketplace enabling mint, buy, and sell with on-chain ownership verification.

Blockchain & Web3 Developer Trainee | NullClass | Aug 2025 – Oct 2025

- Built a Real-Time Crowdfunding DApp on Ethereum for transparent, tamper-proof fund tracking via smart contracts.
- Integrated React.js frontend with Solidity contracts using Ethers.js in a full-stack DApp architecture.

PROJECTS

Decentralized Freelance Marketplace | Solidity, Hardhat, React.js, Ethers.js, IPFS

- Built a Solidity escrow contract that locks client funds and releases payments milestone-wise, with automated dispute resolution and refund handling.
- Developed a React.js + Ethers.js dApp with IPFS-based storage for job and deliverable data, enabling trustless client-freelancer transactions.

Real-Time Crowdfunding Platform | Solidity, Ethereum, React.js, Ethers.js

- Engineered a trustless crowdfunding DApp where funds release automatically on hitting the goal, and contributors get automatic refunds if the target is missed.
- Provided transparent, real-time fund tracking via on-chain events, removing the need for any intermediary.

NFT Marketplace DApp | Solidity, ERC-721, IPFS, React.js

- Developed ERC-721 smart contracts for minting, listing, buying and selling NFTs with on-chain ownership verification.
- Stored NFT metadata on IPFS for decentralized, persistent storage, with a React.js frontend covering the full mint-to-sale flow.

Blockchain-Based Certificate Verification System | Solidity, Ethereum, React.js

- Built an Ethereum DApp that stores certificate hashes on-chain, allowing anyone to verify academic records instantly without a central authority.
- Ensured tamper-proof credentials through immutable on-chain records and issuer-only access for adding certificates.

EDUCATION

B.Tech - Computer Science (Artificial Intelligence)

Greater Noida College 2022-2026

Master of Science– (Computer Science)

Jagat Guru Nanak Dev P.S.O University 2026-2027

,

CERTIFICATIONS

- **Blockchain Development –** Croma Campus (2026)
- **Blockchain Technology** – Codec Technologies (2025)
- **Blockchain Fundamentals** – 101 Blockchains (2024)
- **Bootcamp Training** – ConsenSys Academy (2024)
- **C/C++ Programing –** Incapp (2023)
